

What is Medical Peace Work?

Medical Peace Work is an emerging field of expertise in health work, violence prevention and peace building.

Medical Peace Work is a partnership of medical organizations and teaching institutions committed to the development of this new field of expertise.

And, Medical Peace Work is also a collection of learning and teaching resources for medical peace education.

Teachers and students can access for free:

7 self-running and interactive online courses

Model presentations

The production of the case studies was funded with support from the European Commission.

New from September 2015:

12 Case Studies for group work and peer learning

available
cost-free

at: www.medicalpeacework.org

Case-based learning is a methodological learning approach in which students in groups try to understand a fictive or real case situation and to solve presented challenges. It enables active peer learning.

Intended for doctors, nurses, public health workers, mental health practitioners, other health professionals, as well as students in these fields

Teachers/trainers can access accompanying teaching notes.

- 01

Case 01
 Bridging the divide: Crisis at the district hospital (A) Breaking the barriers (B)
